

CIVIL WAR DIARY BOOKS

By SGT. GEORGE BAUM of Warrick Co., Ind.

INTRODUCTION

By Kenneth R. Baum
Great-grandson
aka Capt. Ken Baum
Co. K., 47th NY Vol. Inf.
4th Brigade US re-enactors in Florida

George Baum enlisted as private, October 19th. 1861 and mustered with Company K of the 42nd Indiana Volunteer Infantry which consisted of all being from Warrick County except for two. Muster rolls show George incorrectly listed as George Bourn but reveals that his complexion was dark, hair light, 5 ft. 6 inches tall, and his home listed as Warrick County. Much could be said about his previous exploits with the regiment as brigaded with the 14th Army Corps that would eventually join in with Sherman's Army that fought their way down to Atlanta, Georgia. That's where George began writing this diary as we have in hand. The 14th Corps was sent to Jonesboro to engage Hood's confederate army and take control of the area south of Atlanta, which they did. After a short breather, they began the pursuit of Hood's Army headed north out of Georgia via Rome and into Alabama. Some of the Corps were ordered towards Nashville, but the 14th Corps was ordered back and began their return to Atlanta. Along the way, George purchased another book at Altoona Station so he could continue writing the diary. 14th Corps arrived just in time to join in Sherman's march to the sea and capture Savanna. After the first of the year, 1865, Sherman's Army began their journey and fight up through South Carolina into North Carolina. In late April, the war ended and they marched through Virginia into Washington City. While encamped there, Sherman's Army did a Grand Review march through the city and back. George received his promotion to Sergeant. Early June the 42nd Indiana regiment was ordered to an encampment at Louisville, Ky. Marched to Harper's Ferry, took a train to Parkersburg, West Virginia, and then boarded a riverboat to Louisville. They stayed camped there until their regiment was mustered out on July 21st, 1865. Hopefully this short overview will help orient the reader in following the journey through the two "log books".

The Foreword describes the diary books and the nature of the written script, plus how the transcript structure handles it. The Preface describes what George wrote about and in manner it was done. The Acknowledgments recognizes those who helped with the transcript process and getting it on this web-site. Following the transcript is a Glossary of the people encountered or mentioned with details identifying a good many of them as to who they were. Also listed are the riverboats that he mentioned boarding, plus my list of interesting places in the diary.

We hope you enjoy reading the adventure that he has painstakingly put down on paper, and wish to present this historical document in honor of George Baum and the 42nd Indiana Vol. Infantry Regt.

FOREWORD

The "Diary" consists of two books that appear to be lined ledgers. The first measures approx. 3 ½" X 7" with 20 pages, having 18 lines on each which are written on front and back. The second measures approx. 3 ½" X 6" with at least 55 pages, having 22 lines on each page and written on in the same manner. I found there are 2 diary pages missing in two different places from my photo copy of this book, either physically because they're missing from the original or by copying errors. This accounts for 7 full recorded days missing and are noted in the transcription.

It is notable that all entries have been written in script using pen and ink. All of the pages were found to be very readable, with no ink spills or drops, with no evidence that they had been rained on and with no bleeding through to the other side. Two pages were found to have a small piece torn out of the paper edge. Four pages were completely missing, unfortunately. At this time it is unknown if the missing pages in my photo copy came about because of a copying errors or were missing from the original book; I think it was the latter.

The nature of George's writing is that most of the sentences lack any punctuation allowing one thought to run into another. Some words are misspelled consistently but easily understood as to what there are. Some were first difficult to interpret because they are split without indication at the end of a line to the beginning of the next line, or letters written above the last word of a sentence because he ran short of space. Some misspelled names of people, towns, rivers etc. are usually found correctly spelled later on as though he must have inquired how to correctly spell them or read them later in a newspaper. Abbreviations were used to save space such as "Mrs. L" who is Mrs. Lucy Baum, his wife. Some of the capital letters like L or H, have a trailing swirl that looked like an "e" and was thus justified in disregarding them during the transcription of those words making them sensibly correct. Overall one could say that George had a nice readable handwriting, as I have seen much worst by census takers and lawyers.

For ease of reading the transcript, I have the beginning of each day starting at the beginning of a line and each day spaced apart. For reference to the original diary, the pages are noted as found including a page miss numbered by George found in the second book. It looks like pages are missing but isn't the case as that day entry continues on to the next numbered day without any gap. In the original script, most of the sentences or phrases would end and start one after another without any intentional space between them or punctuation used. So to make it easy to read, large spaces were added to separate them. The only extra words added are those put in parenthesis () that clarify those words found misspelled that can't be sounded out or deserve a correction. Some words shown depicted as (?) were added to fill in as a "best guess" to those missing because of a small torn out piece in a couple of pages of Book #2. This transcript of the diary from script to type was done in a manner that reflects exactly what was written to the letter without destroying the ambiance of the piece. This allows someone to enjoy reading about this war time experience that might have encounter much difficulty trying to read the original written script, and thus eventually put it aside unread.

PREFACE

You will find that George describes the weather at the beginning of each and every day and narrates about what he, the Boys, or the army is doing during each day in such a way that it is obvious that he pulls out and puts away his diary book often. The subject matter recorded was kept soundly to what he did or saw as an infantry soldier marching with Sherman's Army. Generally speaking, George did not waste any space writing about political issues, long details of his tours of the towns or descriptions of any war carnage witnessed; not even a lavish description after receiving a letter about of his son (William Tecumseh Sherman Baum, my dad's dad) being born (18th of November, 1864) while he was camped outside of Savanna the day before Christmas. But he did on several occasions do some bragging of some "fine No.1 messes" cooked and declare the menu. He was discovered to be a company cook, as revealed in a letter he wrote home of which I had the privilege to hold and read the real thing. Only brief phrases were written during his furlough home in July of '65 as the matter was just not Civil War related. After the day of being mustered out of the Army, not another word was written in his "log book". You would think that he would have described the journey home. But hey, the war and soldiering experience was done, and so was the diary writing.

ACKNOWLEDGMENTS

This project has been a true devotion to the love of Civil War history. A huge note of thanks goes out to my re-enactor friend, Maj. Thomas Criscuolo of the 75th Ohio, who took on the initial task to transcribe the majority of the written script. I am very grateful for his time and effort, as it was no small task as I soon found out while typing up the last couple of pages he didn't have. The typed transcript was proof read with corrections made to the very letter plus adding in the diary page numbers. Quite an undertaking! Even Word 2003 announced it gave up tracking the many irregularities it had encountered. If you are reading this via the 42nd Indiana Regt. web-site, all of us need to thank Tim Beckman for posting this document using his webmaster magic.

I am happy and honored to share this step back in time as you read about the adventures of George Baum as a soldier of Sherman's Army by his daily entries recorded starting from the battle of Jonesboro, Georgia on September 1, 1864 to his muster out on July 21, 1865 at Louisville, Ky. We appreciate each one of you who have participated in this humble effort to authentically preserve and present one more piece of our Civil War history for all to examine.

Your Obedient Servant,
Captain Ken Baum
